**Subject:** Riverfront Access Committee Meeting - Canceled

Good Morning Team,

We will cancel the September meeting as we have no new information to share but are working hard to get the necessary reports to be completed to send to DEEP. Once we get DEEP approval to move forward, we hope to have Jacobsen engineering draw up a site plan for the road and parking area. The botany report is completed and there are no endangered plants in our way. The biological study was held up due to the river flooding in July. We have been told that a report should be done within a week.

Lou and Rick
