

THIRD-PARTY PAYMENT PROCESSORS

Third-party payment services are legitimate payment processors that allow you to pay multiple bills on their websites or apps. However, they are not affiliated with the town, and the town has no control or responsibility over the service they provide or the fees they charge. You are free to work with a third-party payment service; however, you are responsible for any delays or non-payment. Your bill is not paid until we actually receive the funds. This can lead to mistakes, late fees and interest, and interruptions in service – even if you paid the bill payment service on-time.
