RMD	5 acres			3	35'		50'	25'	50'	See Section 4.3.8

\* Density shall be 0.73 when not served by public water or sewer.

**4.2.2 Application of Density Factor**

A. Parcels proposed for residential use shall observe the density factors in Table 4.2.1. These factors shall be applied to parcels of land proposed for residential use to determine the maximum number of permitted lots. The calculation shall be applied as follows:

1. Controlling density factor times net buildable area equals maximum lots permitted.

<b>Illustration of Density Factor Computation – Parcel Zoned RR</b>	
Total Parcel	100 Acres
Area of Wetlands	5 Acres
Area of Steep Slopes	1 Acre
Area of Flood Plain	4 Acres
Total Excludable Area	10 Acres
Net Buildable Area	90 Acres
Density Factor	0.73
Total Lot Yield	66 Lots *
* Yields that are fractional shall be rounded up or down to the nearest whole number	

- B. The density factor shall not apply to subdivisions or re-subdivisions of 4 or less total lots with frontage on an existing public street.
- C. The Commission may, through granting of a special permit, allow an increase of up to 15% of the applicable density requirement under the following conditions.

1. The configuration of the property is such that the additional density can readily be accommodated on the site without the necessity of introducing either rear lots or lots of unusual configuration, i.e., lots that are not generally rectangular in configuration, and/or existing public road frontage is such that the additional density can readily be

accommodated on the site without the necessity of introducing either rear lots or lots of unusual configuration, i.e., lots that are not generally rectangular in configuration.

2. Wetlands, water bodies, flood plains, and slopes in excess of 25% are situated on the site such that the additional density can readily be accommodated on the site without encroaching upon these resources.
- D. As part of the application for a special permit, the applicant shall submit a plan which complies with the applicable density standard and an alternate plan that shows the desired increase in density. Submitted plans shall comply with the requirements of Section 03.05.02 of the Subdivision Regulations.

### 4.2.3 Requirements Based on Availability of Utilities

The availability of public water and/or public sewer shall be a factor when computing minimum lots sizes within the Town of Portland. Minimum lot sizes as dictated by the availability of public utilities shall comply with Table 4.2.3. However, should the minimum zoning requirements of Table 4.2.1 exceed the lot size requirements based upon the availability of public utilities, the minimum requirements of Table 4.2.1 shall be complied with.

<b>Table 4.2.3 Minimum Lot Size Based on Availability of Utilities</b>				
<b>Zone</b>	<b>Sewer &amp; Water</b>	<b>Sewer Only</b>	<b>Water Only</b>	<b>No Utilities</b>
RR	1 acre	1 acre	1 acre	1 acre
R-25	25,000 sq. ft.	25,000 sq. ft.	25,000 sq. ft.	1 acre
R-15	15,000 sq. ft.	20,000 sq. ft.	25,000 sq. ft.	1 acre
R-10	10,000 sq. ft.	20,000 sq. ft.	25,000 sq. ft.	1 acre

### 4.2.4 Two-Family Dwellings

- A. Schedule of Area and Dimensional Requirements

<b>Table 4.2.4 Area, Height, Coverage and Setback Requirements</b>								
<b>Zone</b>	<b>Min Area</b>	<b>Min Width</b>	<b>Min Depth</b>	<b>Max Height</b>	<b>Max % Lot Coverage</b>	<b>Min Front Yard</b>	<b>Min Side Yard</b>	<b>Min Rear Yard</b>
R-25	1 acre	150'	200'	35'	10%	50'	25'	75'
R-15	22,500 sq. ft.	125'	150'	35'	15%	40'	20'	50'
R-10	15,000 sq. ft.	100'	125'	35'	20%	30'	20'	40'

- B. In areas where no public water or sewer exist, it is recognized that occupancy of a two-family dwelling may at some time place additional demands on the subsurface sewage disposal system through increases in water usage. Prior to granting an approval for a two-family dwelling, the Portland Sanitarian must verify to the Commission that the building lot can satisfy all the current requirements of the Connecticut Public Health Code for subsurface sewage disposal.
- C. In addition to the Site Plan review requirements specified in Article 10, the applicant shall submit architectural renderings and/or elevations, an exterior facade materials list, landscaped yard area and any other information the Commission may feel essential to accompany the application.

**Section 4.3 Residential Multiple Dwelling Zone**

**4.3.1 Applicability**

The provisions of this section apply only to those properties approved under this section prior to November 9, 2007.

Effective November 9, 2007, the Residential Multiple Dwelling Zone (RMD) was eliminated in the Town of Portland. Any subsequent applications for Multiple Dwelling units or amendments to a previously approved RMD development shall be submitted under and governed by Section 9.16, Multiple-Dwelling Development.
